Foreword .....	1
----------------	---

### PART I

#### **BEYOND THE SACRED COWS. ALLOCATING TO THE LONG RUN**

<b>Essay 1. Sacred Cows .....</b>	<b>7</b>
Setting the scene .....	7
Governance of investment beliefs. Alpha and beta policies.....	9
A review of sacred cows.....	12
<i>Risk-free asset</i> .....	13
<i>Government bonds and portfolio construction</i> .....	14
<i>Diversification and concentration</i> .....	16
<i>Hierarchy of risk premia</i> .....	16
<i>Correlations</i> .....	18
<i>Risk, return, liquidity and transparency</i> .....	19
<i>Long-term returns</i> .....	21
<i>Short-term and long-term</i> .....	23
<i>Benchmarks</i> .....	25
<i>(Il)liquidity and return</i> .....	31
<i>Imperfect normality</i> .....	35
<b>Essay 2. The Long-Term.....</b>	<b>37</b>
In search of a positive concept of long-term.....	37
Saving the concept of long-term.....	40

---

	<i>Practices, incentives and institutions</i> .....	40
	<i>The funding role of the long-term investor</i> .....	43
	<i>Mispricings</i> .....	44
	The long-term as duration and a process .....	47
	<i>The natural long-term investor</i> .....	48
<b>Essay 3.</b>	<b>Allocation</b> .....	53
	Beyond the classic asset allocation framework .....	54
	Asset and (macro) factor polarisation for diversification .....	57
	Market stress and risk regimes .....	60
	Smart solutions, no free lunch, execution is key .....	61
	Diversifying into currencies .....	64
	<i>Currency returns</i> .....	66
	<i>Currency factor allocation. Currencies as proxies or hedges</i> .....	68
	<i>Organisational aspects of FX investment</i> .....	72
	Allocation for SWF.....	76
<b>Essay 4.</b>	<b>Revisiting the concepts of active and passive management</b> .....	79
	From smart beta to factor allocation .....	79
	Beyond active and passive investment .....	81
	<i>There are only active exposures; the rest is (passive) implementation</i> .....	82
	Challenging smart beta, playing the devil's advocate	84
	Exploiting inefficiencies.....	86
	<i>Challenging the theory</i> .....	86
	<i>All in the same (factor) boat</i> .....	88
	<i>Institutional dilemmas and choices</i> .....	90
	<i>Long-term arbitrages of inefficiencies</i> .....	92

## PART II

## THE DYNAMICS OF THE FINANCIAL MARKETS

<b>Essay 5.</b>	<b>Value, Liquidity and Stock Markets .....</b>	<b>97</b>
	The macro regime, from disinflation to excess liquidity.....	97
	<i>Liquidity as a stock, a preference, an exchange, a path .....</i>	99
	<i>From monetary stimulation to bubbles .....</i>	102
	Are shares always bonds?.....	106
	<i>The preference between shares and bonds .....</i>	107
	<i>Valuing the Stock Market. A practical attempt.....</i>	109
<b>Essay 6.</b>	<b>The Cycle, Liquidity and Interest Rates .....</b>	<b>117</b>
	The yield curve and the real cycle .....	117
	The price of liquidity and the global economic cycle.....	119
	<i>The role of (de)synchronisation of global growth .....</i>	122
	Speed and duration rather than direction. Non-linear movements in asset prices .....	123
	Equilibrium in the macro-economic and financial regime .....	126
	<i>Equilibrium. A positive approach to real interest rates .....</i>	129
	<i>The concept of bond bubbles and the deflationary risk.....</i>	133
<b>Essay 7.</b>	<b>Exchange Rates, Prices without Equilibrium.....</b>	<b>143</b>
	Beyond the illusory adjustment towards equilibrium value.....	143
	<i>A positive approach to value on the currency markets .....</i>	144
	<i>Why hold currency X as opposed to currency Y? .....</i>	145
	The abundance of a currency and its price .....	148
	<i>The example of the launch of the euro .....</i>	151
	<i>Will the prevailing price lead to a modification of stocks held?.....</i>	153
<b>Essay 8.</b>	<b>Searching for Reference Points. Investing in Understanding .....</b>	<b>159</b>
	Is normalisation impossible? .....	159
	Central banking policies. The end of the beginning ...	168

Asset managers, corporate investment banks, central banks. The regime of the long-term financing of the economy.....	171
Inflation as a total phenomenon.....	174

## PART III

**DURATION, MEMORY, FORGETFULNESS  
AND ASSET PRICES**

<b>Essay 9. Anatomy of the Stock Market.....</b>	<b>179</b>
Time referential and genomial identities .....	179
<i>Rises, falls and speed</i> .....	184
<i>Hereditary macro-financial regimes</i> .....	186
Time, money and the equity risk premium.....	187
<i>The function of preference for the Stock Market</i> .....	190
<i>Preferences and the future performance of the Stock Market</i> .....	195
The imaginary nature of the Stock Market .....	199
<b>Essay 10. Money, Memory and the Interest Rate.....</b>	<b>205</b>
Equilibrium and the memorised interest rate .....	207
<i>Velocity of money</i> .....	209
<i>Absolute and (limited) relative equilibrium</i> .....	210
A global approach to inflation and the interest rate....	213
<i>The natural interest rate</i> .....	217
The cycle as a function of the value given to time ....	219
The concept of global .....	222
The monetary dynamics of liquidity .....	224
<i>The real and financial spheres and the general level of prices</i> .....	228
<i>The real and financial spheres and the equilibrium interest rate</i> .....	229
<i>The financial veil and reality</i> .....	233
<b>Essay 11. Psychological Time, Value and Language .....</b>	<b>235</b>
What is value? Substance, price and exchange.....	235
<i>Value as an experience of time</i> .....	236
<i>Value as a process making substance</i> .....	239
Economic grammar.....	240
<i>Economics as a discourse</i> .....	240
<i>The language of the inner consciousness of economic time</i> .....	242

Transdisciplinary spaces. Neurology and subjective distortions of temporality.....	244
<i>Discounting expected emotions</i> .....	244
<i>Definitions of time. Apperception of time and causal asymmetry</i> .....	246
<i>Habitus, continuum, flat time effects</i> .....	247

PART IV

**RISKS OF THE UNKNOWN. LIQUIDITY AND OTHER MISSING LINKS OF MPT**

<b>Essay 12. Investing in a QE-Infested World. The Map and the Territory</b> .....	253
Aspects of the theatre of operations.....	254
<i>FX in a QE-infested world</i> .....	254
<i>Different wisdom</i> .....	255
<i>The demand function for financial assets</i> .....	255
The third missing element (the liquidity conundrum)	256
<i>The liquidity perception function</i> .....	260
<i>Liquid vs. illiquid, blurred distinction</i> .....	260
<i>Return vs. diversification</i> .....	260
<i>Illiquid assets (challenges)</i> .....	261
Something new in place (secular stagnation).....	261
Poorly remunerated risks (shaping free options).....	263
Governance .....	264
Regime: features, consequences, exit .....	266
The concept of emerging markets.....	270
Risks of the unknown .....	272
<i>Maximisation of return</i> .....	273
<i>Channelling excess liquidity</i> .....	273
<i>Example of China</i> .....	276
The nature of returns. Returns as a monetary phenomenon.....	277
<b>Essay 13. The Reincarnation of Diversification</b> .....	281
Impacts of the new monetary policy framework .....	282
<i>From asset class to risk factor diversification</i> .....	283
<i>International diversification: do not forget currencies</i> .....	285
<i>Catching illiquidity premia</i> .....	286

	<i>Investment horizon diversification</i> .....	287
	<i>Challenges for long-term investors</i> .....	288
	Modern Portfolio Theory Side-lined.....	289
	<i>Challenges to traditional diversification approaches</i> .....	289
	<i>Answers to the post-crisis environment</i> .....	292
	Factor investing, poorly remunerated risks and alpha generation .....	294
	Liquidity and the paradox of tranquillity.....	300
<b>Essay 14.</b>	<b>Liquidity Function, Savings Accelerator and Multiplication Effects</b> .....	303
	The liquidity function (L) .....	303
	Representations of the liquidity function.....	305
	The utility function of government bonds .....	308
	An attack on the efficiency approach .....	311
	Speed, acceleration and multiplication .....	312
	<i>Monetary acceleration, the g factor</i> .....	314
	<i>Limited rationality</i> .....	315
	Hereditary forms and the referential.....	317
	<i>Hereditary multiplication and acceleration effects</i> ....	319
	<i>Value in the referential</i> .....	320
	<i>Positive, realistic equilibrium regimes</i> .....	321
	The savings multiplier .....	322
	<i>The question of the acceleration of savings</i> .....	323
	<i>Psyche and the savings multiplier</i> .....	325
	A reformulation of portfolio theory ( $U_{pd}$ , $R_p$ , $L$ ).....	328
	Propositions .....	332

## PART V

## THE ECONOMIC AND FINANCIAL PSYCHE

<b>Essay 15.</b>	<b>Phenomenology of Economic and Financial Perception</b> .....	345
	Limited rationality and subjective probabilities .....	345
	The notion of utility. Perceived utility.....	353
	The classical description, a special case.....	355
	<i>The HRSLR hypothesis</i> .....	356
	<i>SPSTR (DMF, CPB). Psyche, entropy and isotopic chronology</i> .....	357
	Irrationalities and anomalies.....	358

<i>The problem of price deviation from fundamental value.....</i>	358
<i>The anomaly of quality .....</i>	361
<i>Patterns of crisis .....</i>	362
<i>Perception, “objectivities” and so-called anomalies.....</i>	363
<i>The hypothesis of reality and truth effects of perception.....</i>	364
<i>Perceived risk .....</i>	365
<i>The obsession for predicting returns.....</i>	367
<i>The state of equilibrium and the rationality of the Subject .....</i>	369
<i>The Efficient Phenomenology of Perception Hypothesis (EPPH) .....</i>	370
<i>Regimes, habitus, errors .....</i>	372
<i>Psychological Dynamic Equilibrium of Regimes .....</i>	373
<i>Money and time. An interpretation of QE .....</i>	374
<i>State of quantities and psychological times .....</i>	376
<i>A reinterpretation of the quantitative theory of money .....</i>	379
<i>Analogies and differences with physical systems. Speed and temperature.....</i>	379
<i>Total internal energy of financial systems.....</i>	383
<i>The normal and the pathological.....</i>	384

PART VI

THE MACRO-FINANCIAL REGIME - FLASHBACKS

<b>Essay 16. Macro-Economic Forms of Risk. The Economics of Disequilibrium (I) .....</b>	<b>391</b>
Disequilibrium .....	391
<i>Paradoxes of savings and credit.....</i>	393
<i>Liquidity versus money .....</i>	393
The model.....	393
Example. The Japanese liquidity pump; the US/Asian liquidity axis .....	394
<i>Regime and causalities .....</i>	394
Regimes in the emerging economies .....	395
<i>Patterns and features .....</i>	395
<i>Lessons from the end of the 20<sup>th</sup> century.....</i>	397
<i>The Chinese miracle .....</i>	400
In search of inflation.....	403
The uncertain paths of liquidity .....	404

	<i>Real sphere and financial sphere</i> .....	405
	<i>An Austrian interpretation framework</i> .....	407
	<i>Archaeology of deflation</i> .....	409
	<i>Patterns of interpretation</i> .....	410
	<i>Cumulative stock phenomenon and boomerang effect</i> .....	412
	<i>Monetary asymmetry and monetary fatality</i> .....	413
	<i>Transfers of risk</i> .....	415
	<i>Activism</i> .....	416
<b>Essay 17.</b>	<b>Macro-Economic Forms of Risk (ctd). The Normal and the Pathological (II)</b> .....	419
	<i>Excess supply overhangs</i> .....	419
	<i>Reference patterns</i> .....	422
	<i>Reference 1. US, 1987</i> .....	422
	<i>Reference 2. Japan, 1990's</i> .....	422
	<i>Reference 3. US, 1930's</i> .....	423
	<i>Overcapacities, prices and profits</i> .....	424
	<i>Financial inflation</i> .....	427
	<i>Causes and manifestations of disequilibrium</i> .....	427
	<i>The regulation of conflicts between the market and monetary institutions</i> .....	428
	<i>Inflation and the (social) equilibrium of the macro-economic regime</i> .....	430
	<i>Some features of the current regime</i> .....	433
	<i>The normal and the pathological</i> .....	434
	<i>The visible and the invisible. The real and the natural interest rate</i> .....	435
	<i>Coda</i> .....	440
<b>Essay 18.</b>	<b>Forces for Change</b> .....	447
	<i>The US dollar debt standard</i> .....	447
	<i>Forms of protectionism</i> .....	447
	<i>The "US dollar debt standard" as a form of protectionism</i> .....	449
	<i>Forces for change in respect of the renmimbi and the euro</i> .....	452
	<i>Transformation</i> .....	454
	<i>Towards a new economic regime</i> .....	456
	<i>The long-term financing regime for the economy</i> .....	456
	<i>The macro-financial regime</i> .....	457
	<i>The total nature of inflation. Connecting asset prices and the real sphere</i> .....	462
	<i>Price context</i> .....	462
	<i>Regime</i> .....	464

<i>Markets and asset prices</i> .....	465
<i>Inflation, a total phenomenon</i> .....	469
Investing in the new pattern of globalisation. Investing in endogeneity.....	471
Assumption .....	472
<i>Illustration of the emergence of the endogeneity them (2011-2016). D and e factors</i> .....	474
Change in paradigm and investors' approach.....	474
<i>Long-term reality</i> .....	475
<i>Macro-economic level. Temporary, cyclical?</i> .....	476
The regime of long-term anticipations. The case of emerging markets.....	477

PART VII

THE DYNAMIC OF THE FIELDS OF CHOICE

<b>Essay 19. Marginal Psychological Returns and Fundamental Prices</b> .....	483
A critique of Allais's theoretical theses (1) .....	483
The notion of a marginal rate (psychological return) of accumulation and decumulation of memory .....	491
<i>Definitions</i> .....	491
<i>Graphical presentation of all the situations</i> .....	493
The dynamic of the marginal rates of substitution of time-values and of fundamental prices.....	495
A critique of Allais's theoretical theses (2) and of tradition.....	503
<i>Allaisian convergences</i> .....	503
<i>A general incorporation of tradition and of Allais's theses</i> .....	506
<b>Bibliography</b> .....	517
<b>Table of Figures</b> .....	541
